1. On 3 August 1951 it was observed that the military unit quartered in the barracks on the north side of Dospat had installed and were using one large searchlight. The beam of the searchlight was used from after dark until approximately 1:00 a.m. and was played along the highway running east and west from Dospat. This highway is clearly visible along its entire length for several kilometers from where the searchlight is located. The light is used alternately on the east and west sides, playing its beam several seconds on each side.
2. Along the system of road networks from Dospat to the rail line and along the rail line up to Pazardzhik there are large stockpiles of lumber. This lumber is being hauled out at a rapid rate for the government construction program. During the night troops and several guards are used to patrol the stockpile areas.
